## CATERING FOR ALL VEHICLES OLDER THAN 31<sup>ST</sup> DECEMBER 1980 OF ORIGINAL DESIGN

Visitors from other clubs passing through Lismore & Casino are always welcome at our club outings and meetings. Meetings of the club are the **SECOND WEDNESDAY** of each month at the **LISMORE WORKERS CLUB** , Keen Street, Lismore at 7.30pm.

OPINIONS EXPRESSED IN THIS MAGAZINE ARE NOT NECESSARILY THOSE OF THE CLUB.

### GUIDELINES FOR CONDITIONAL REGISTRATION (CLUB PLATES)

All NRVVCC members should familiarize themselves with the NSW RMS rules and club rules surrounding how to use your vehicles on Conditional registration, together with the requirement to carry certain documents in the vehicle whenever it is being used.

If you are **on the log book trial**, the RMS issued log book must be completed by the member before you use the vehicle for anything **other than** NRVVCC club outings. Vehicles **not on log book**, the member should phone/email the secretary when a movement is needed for anything **other than** club outings.

Any member with vehicles(s) conditionally registered through the NRVVCC and who do not attend a **minimum of three club events per calendar year** (not including registration day & meetings) may be asked by the committee to show cause as to why the club should sanction the renewal of their registration in the following year.

**The Club cannot afford the risk of the system being abused and the subsequent loss of the benefits of these worthwhile concessions for other Club members.**

Klaxon printing will commence. Discussion on postage . Committee to meet.

MEETING CLOSED 11.40 am

NEXT MEETING 14th Oct.  
Lismore Workers Club.

# KYOGLE RUN ~ For morning tea

The run to Kyogle was uneventful except for holdups with major road works in South Lismore, however we still made it to the Information Centre Park by 9-30am.

Elbowing each other had a whole new meaning as we gathered together under the park shelter. It was also great getting together as the curse COVID 19 Virus has kept family and friends apart for over long periods. It was also great to catch up with Doug, Pam and Jason Campbell again as they came down to join us for the duration of the morning.

Most of us brought our morning tea with us and the mild weather conditions made the morning very enjoyable. Our drive home was uneventful but slow, as we followed a cement truck for most of the way. A Big Thank You go to the Events Committee for organising the day for us.

**Members Attending** / R&I McLeod - 1979 Kombi. L&G Campbell - 1966 Mustang, R&M Hawkins -1929 Dodge, J&R Hayward - 1929 Chrysler, R Lovell - 1959 Velocette Motor Cycle, D, P & J Campbell - Rod Johnston - 1985 XJS Jaguar, J Gill - Essex, R&N Hambly - Modern.

My excuse for going modern

“What a shock!! Editor

# Outing to Faulks Park

## Morning Tea & Club Meeting

It seemed that the weather was arranged just for us when we set up our chairs and tables on the lawn facing the river. We also had the added entertainment of watching speed boats racing up and down the river as we enjoyed our BYO morning tea. Those members who came Vintage & veteran with their vehicles lined up along the street had an added interest to neighbours as well as the public passing through. Catching up with members that we hadn't seen for some time over morning tea also added to another enjoyable outing,

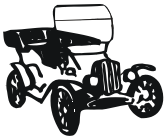

At eleven AM, the Club Meeting by the river commenced with President, Secretary & Treasurer expressing their individual reports with the roar of speed boats up and down the river behind them. Though the meeting was as usual, noticeably missing was the sound of the Klaxon Horn letting us know the beginning & end of our club meeting? We express our Thanks to the Events Committee for organising an enjoyable outing by the river in Ballina.

### Members Attending –

Group 1 ; M Johnston, R&N Hambly – Modern, J&R Hayward – 1929 Dodge Sedan, G C Lowrey – 1925 Studebaker, R&M Hawkins – A Ford, I&R McLeod – 1979 VW Combi, G&E Campbell – 1929 Dodge Tourer, T&J Prodger – 1921 Sports Cowley, R&M Lovell – 1970 Mini Cooper, N&M Clapham – Modern, R Swinton - Modern

## TOOLS AND THEIR ACTUAL USE

**DRILL PRESS:** A tall upright machine useful for suddenly snatching flat metal bar stock out of your hands so that it smacks you in the knuckles and flings your beer across the room, splattering it against that freshly painted part that was set aside to dry.

**WIRE WHEEL:** Cleans paint off bolts and then throws them somewhere under the workbench with the speed of light. Also removes fingerprint whorls and hard-earned guitar calluses in about the time it takes you to say, "Ouch..."

**ELECTRIC HAND DRILL:** Normally used for spinning pop rivets in their holes until you die of old age. Also useful for spinning drill bits in reverse until the tip glows red.

**PLIERS:** Used to round off bolt heads.

**HACKSAW:** One of a family of cutting tools built on the Ouija Board Principle. It transforms human energy into a crooked, unpredictable motion, and the more you attempt to influence its course, the more dismal your future becomes.

**WISE-GRIPS:** Used to round off bolt heads. If nothing else is available, they can also be used to transfer intense welding heat to the palm of your hand.

**OXYACETYLENE TORCH:** Used almost entirely for lighting various flammable objects in your shop on fire. Also handy for igniting the grease inside the wheel hub you want the bearing race out of.

**WHITWORTH SOCKETS:** Once used for working on older British cars and motorcycles, they are now used mainly for impersonating that 9/16" or 1/2" socket you've been searching for the last 15 minutes.

**HYDRAULIC FLOOR JACK:** Used for lowering an automobile to the ground after you have installed your new disk brake pads, trapping the jack handle firmly under the bumper.

**EIGHT-FOOT LONG 2X4:** Used for levering an automobile upward off a hydraulic jack handle.

**TWEEZERS:** A tool for removing wood and metal splinters. It is made from a magical material that turns invisible when you need it, and re-appears when you don't.

**PHONE:** Tool for calling your neighbours to see if he has another hydraulic floor jack. Also useful for calling the parts store and complaining that the moron at the counter gave you what you asked for, and it's not the right one.

**SNAP-ON GASKET SCRAPER:** Theoretically useful as a sandwich tool for spreading mayonnaise; used mainly for getting dog poop off your boot.

**E-Z OUT BOLT AND STUD EXTRACTOR:** A tool ten times harder than any known drill bit that snaps off in bolt holes you absolutely have to have.

**TWO-TON ENGINE HOIST:** A tool for testing the tensile strength on everything you forgot to disconnect.

**CRAFTSMAN 1/2" x 16-INCH SCREWDRIVER:** A large pry bar that inexplicably has an accurately machined screwdriver tip on the end opposite the handle.

**AVIATION METAL SNIPS:** See hacksaw.

**TROUBLE LIGHT:** The home mechanic's own tanning booth. Sometimes called a drop light, it is a good source of vitamin D, "the Sunshine Vitamin," which is not otherwise found under cars at night. Health benefits aside, it's main purpose is to consume 40-watt light bulbs at about the same rate that 105-mm howitzer shells might be used during, say, the first few hours of the Battle of the Bulge. More often dark than light, its name is somewhat misleading.

**PHILLIPS SCREWDRIVER:** Normally used to stab the lids of old-style paper-and-tin oil cans and splash oil on your shirt; but can also be used, as the name implies, to strip the star out of Phillips screw heads.

**AIR COMPRESSOR:** A machine that takes energy produced in a coal-burning power plant 200 miles away and transforms it into compressed air that travels by hose to a Pneumatic impact wrench that grips rusty bolts last over-tightened 58 years ago by someone at Chevrolet, and neatly rounds off their heads.

**PRY BAR:** A tool used to crumple the expensive metal surrounding that clip or bracket you needed to remove in order to replace a .50 cent part. Also used to bend or break expensive, irreplaceable, collector car parts.

**HOSE CUTTER:** A tool used to cut hoses too short.

**HAMMER:** Originally employed as a weapon of war, the hammer nowadays is used as a kind of divining rod to locate the most expensive parts not far from the object we are trying to hit.

**MECHANIC'S KNIFE:** Used to open and slice through the contents of cardboard cartons delivered to your front door; works particularly well on contents such as seats, vinyl records, liquids in plastic bottles, collector magazines, refund checks, and rubber or plastic parts.

**DAMMIT TOOL:** Any handy tool that you grab and throw across the garage while yelling "DAMMIT" at the top of your lungs. It is also the next tool that you will need.

**MIG WELDER:** A Multi Purpose device which can be used for any of the following:

1. Blowing large holes in sheets of stainless or gal. (The more expensive the object, the bigger the hole)
2. Setting trousers / shirt sleeves on fire.
3. Setting bush / scrub on fire. (when used outdoors)
4. Creating "Swiss cheese" socks / shirts / trousers.
5. Tanning.
6. Heating up Vice-Grips.

**LATHE:** A handy piece of workshop equipment primarily used to turn very important parts undersize.

**ZIP TIES:** The friendly alternative to a rounded bolt and nut.

**ALLEN KEYS:** Made in every size to be just .05 of a mill to small or big than the size you really need.

**SHIFTER:** small hand lathe used for rounding off bolt heads.

**MASKING TAPE :** The solution to all of lifes problems

**DYNA BOLTS:** 3 out of 4 guaranteed to work.

**45 degree MITRE BOX.:** Should cut an angle at 44 or 46 degrees.

**EXTENSION LEAD:** Either too short, or Tangled. One of the two

**ANGLE GRINDER:** Very unforgiving cutter.

**TIN SNIPS.** - Will cause tin/metal to fold up and cut knuckles.
